Finish Date

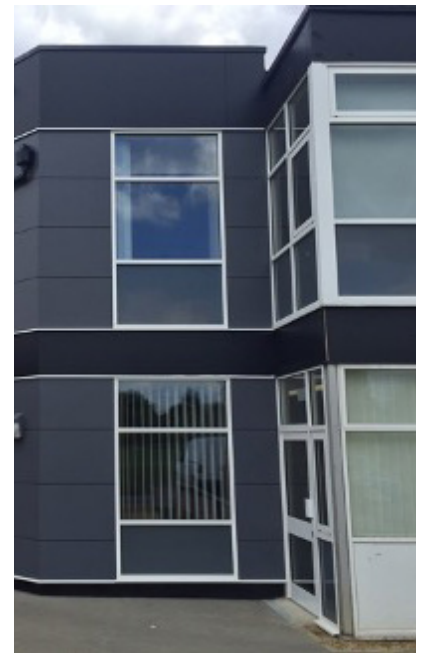

21.08.2023

Value

£500,000.00

Form of Contract

JCT Contract Consultants Property
Tectronics

Project Description

Extension to D-block to create a new double storey dining room and boardroom facilities, together with new car parking and cycle facilities. GD Construction was appointed to complete a large £500k extension to the existing D-block to provide additional dining room facilities. This block also provides additional boardroom space for meetings and student examinations. A new exit to the main car park is being constructed to provide an 'in' and 'out' which will significantly improve traffic flow.

Challenges Overcome

Working in occupied school premises required careful site segregation and a considerate contractor. A temporary traffic system was installed to allow parent drop off away from site traffic
