

## Hemel Hempstead Hospital - NOUS

### Project Overview

#### Client

GSCI Consultants on behalf of West Herts Teaching Hospitals NHS Trust

#### Start Date

03.03.2025

#### Finish Date

20.06.2025

#### Value

£592,526.53

#### Form of Contract

NEC

### Project Description

GD Construction were tasked with the full demolition and refurbishment of 2nr ultrasound rooms. In addition, we were tasked with the installation of a new AHU within an external courtyard. For the AHU, new drainage works were required, along with ground works and a steel frame for the AHU to sit. The AHU was a "plantroom type".

#### Services provided by GD Construction:

- New 600x600 grid ceilings
- New lighting
- New power and data
- New nurse call
- New EBB's
- New electrical distribution
- New ventilation
- New domestic water supplies
- New vinyl floorings
- New underground drainage
- Reduced dig, concrete foundations
- Steel frame
- Handrails
- External paving
- New decorations
- New doorsets
- New partitions
- New IPS units
- New kitchens and worktops
- Fire stopping
- Specialist services re-installation
- FFE

## Challenges Overcome

1. Enclosed courtyard – unable to walk/drive things into the area. All items having to go over the top where long/heavy.
2. The entirety of the department remained live with staff and patients.
3. Segregating ourselves from the LIVE dept.
4. Noise.
