**Value**

£434,210.00

**Form of Contract**

Framework with QTS

### Project Description

The existing Place of Safety Suite at the Campbell Centre needs to be modernised to comply with current requirements. A security air lock is being formed at the entrance giving access to a waiting area with a supporting wc. An inner lobby provides access to a new assessment room with a dedicated wc, and with an adjacent HBPoS office /prep area with an observation screen in the dividing wall.

### Challenges Overcome

1. Working within a mental health.
2. Very noisy work within a mental health setting when installing drainage internally.
3. Adding down time of noisy during working hours to allow the service users time to rest.
4. Meeting time project time even with additional work and design changes.
